

# 13th Annual Essay Contest

**3rd Place**  
**Ethan Hua**  
**2nd grade**

SuperMath has changed my life from the way I learn at school to every day in life. SuperMath was hard for me at first, but later it was beginning to make sense to me. SuperMath helps me process my thoughts faster and Anzan improves my listening skill and visualize things better. Every time I start on a new book, I would make a lot of mistakes, but my mom reminds me to never give up as “practice makes perfect”.

I feel the abacus is like a magic tool as a few simple row of beads can help to solve all the addition, subtraction, multiplication and division problem. SuperMath has given me confidence in myself and allowed me to be ahead of my grade-level math at school. I also like both of my SuperMath teachers as they always encourage me to learn and pass the test.

Thank you SuperMath for everything!
