

# 13th Annual Essay Contest

**1<sup>st</sup> Place**

**Rohan Ramkumar**

**3rd grade**

Before I started SuperMath, complex mental calculations were difficult for me. After I learned higher levels of Anzan, I can complete the daily math drills at school in less than 25 seconds! When I do long division at school, I can easily check my work, using Soroban method.

I credit SuperMath for giving me a solid foundation in math. By doing SuperMath, I have learned how to set higher goals and to achieve them. SuperMath doesn't only teach me math, it also teaches me perseverance, focus and attention which helps in other areas like sports and music.

Thank you SuperMath! I hope to join the Dan ranks in time for the next Contest.
