SuperMath has helped me succeed in math since I started. Not only do I learn how to use the abacus in tremendous way, but I have the abacus visual in my head when I go to do mental math.

I also love SuperMath, because I love the feeling when I pass a hard book. My teacher, Mrs. Like, is a great teacher because she is great at explaining stuff I don't understand.

One last reason I love SuperMath is because it pushes me very hard to do what I didn't think is possible for me. It is also a great feeling to know I can do cool things that other people cannot do.
