

# 14<sup>th</sup> Annual Essay Contest

**5th Place**

**Cory Wong**

**4-Dan**

**3rd grade**

All About SuperMath! SuperMath has helped me improve my math. I never heard of an abacus before but when my mom brought me here, I was fascinated by how the abacus moved.

My goal was to get to Dan, and when I got there, I wanted to learn more. SuperMath has taught me that if you practice something every day, even when it gets hard and if you don't give up, you will succeed.

I will always remember Mrs. Watanabe said at my first Contest, "When you hit a wall, it means you are learning."
